Once work is completed, HEMS Enterprise automatically notifies the requesters and issues a quality survey to them.

You receive immediate feedback on your efforts from each requester without expending any time or effort.

Full-time administrative support without the overhead — HEMS Enterprise.

Don't wonder about what your requesters think.

With HEMS Enterprise and Web Request, you automatically receive the feedback you need to improve performance, identify problems before they escalate and clearly define your success clearly through the satisfaction surveying built directly into the system — another enterprise solution from EQ2.
